

# Cervical Health Awareness Month

“Each year, an estimated 12,000 women are diagnosed with cervical cancer, and, of those, about one-third will die as a result of the cancer. But cervical cancer is also a highly preventable and treatable cancer, thanks to improved screening and vaccination.” (HealthyWomen)

We hope you find this health observance quick-guide helpful! Roll over text to find live links to sites and materials. Most messages, materials, and facts can be adapted to fit other audiences not specifically depicted here.

## Social media

### Hashtag

#CervicalHealthMonth

### Facebook

NCCC-National Cervical Cancer Coalition  
American Sexual Health Association

### Twitter

@StopHPVCancer  
@InfoASHA

### Youtube

American Sexual Health Association

Social media can be a great tool for finding up-to-date resources and facts. Follow leading organizations to find out what they are doing, share their posts, and join in national chats.

One of the easiest ways to find more resources is to search the hashtag for this observance. This can be done on almost all social media sites. Include it in any posts you create.

*Please share these documents and consider tagging the Centers: @UMN\_MCH and @SahrcUMN.*

If available, use logos and other graphics to enhance your posts, emails, or websites. Visuals help catch people's attention and often have higher engagement numbers.

Use available facts from these organizations to create quick and easy posts for social media or a newsletter. Many also provide templates for press releases and other modes of communication.

Compiled with the help of the University of Minnesota State Adolescent Health Resource Center (SAHRC), part of the Adolescent and Young Adult Health - National Resource Center.
